- Up to 4 TB capacity\*
- Up to 252 GB/hr performance\*
- Support for Ultrium LTO-1 and Ultrium LTO-2 tape drives

\* assumes 2:1 compression

### About the 110L Tape Autoloader

The Exabyte 110L LTO Ultrium autoloader brings world-class automation to users who have chosen the LTO drive technology and need the benefits of entry-level midrange automation. Ideal for distributed networks and remote installations, the 110L is a compact alternative to stand-alone tape drives, eliminating the need to manually load tapes, increasing data reliability and reducing the investment required for the backup/ restore process.

Easy to install and use, the 110L's user-friendly LCD screen guides users through status, diagnostic and help functions. Our Plus models feature Remote Management capabilities with the addition of an Ethernet port.

Available with either an LTO-1 or LTO-2 tape drive, the 110L is ideally suited for budget-conscious midrange applications experiencing rapid data growth and decreased backup windows. The 110L offers the flexibility to upgrade to next-generation tape drives as capacities and system performance rates increase by simply replacing the tape drive.

With access to as many as 10 data cartridge slots, the 110L can automatically take care of up to 2 weeks worth of daily backups.

Providing users with the best combination of capability, reliability and affordability, the 110L is the ideal choice for midrange applications wanting to affordably experience the benefits of LTO automation.
