About the VXA-2 PacketLoader 1x10 1U Autoloader

Up to two weeks of unattended backup in a slim design starting at only \$1,999 (street). The VXA PacketLoader 1x10 1U autoloaders with VXA-2 are the most affordable, compact automated data storage solution for users with space and budget constraints. With one VXA-2 drive and up to 10 VXA tapes, the 1.6TB PacketLoader 1x10 Autoloaders lead in capacity and price over other rack mounted autoloaders, making them the preferred storage companion for small business and workgroup servers.

Stay on top of things remotely. The VXA-2 PacketLoader 1x10 1U Plus adds the capability to remotely configure/mange the autoloader by means of a standard web browser and/or monitor by means of automated e-mail alerts so that you can be in control of the PacketLoader 1U form anywhere in the world.

Easy to Use. Simply attach the VXA PacketLoader 1x10 autoloader to your server and the user-friendly operator panel will allow you to be up and running with automated data protection in minutes. This no hassle solution will dramatically reduce down time, user error and resource obligations for your organization.
